Work Experience

Frontend Developer *and UI/UX Designer — Broadheader, Remote*
Nov. 2024 - Present

Technologies: *ReactJS, MaterialUI, Droid CLI, Gemini CLI, Claude MCP Server, Figma, TypeScript, Tailwind CSS, REST APIs, Vitest, Web APIs, Supabase*

- Design and iterate innovative user interfaces and interactions, which result in improved user productivity and experience.
- Collaborated with the project manager to understand project requirements, providing technical recommendations and delivering tailored frontend solutions that align with business goals.
- Led the design team and development for diverse projects, including trading platforms, booking services website, company website design, redesigns for existing pages and all the design assets needed for the team.
- Implemented UI components and page layouts, integrated REST APIs, and optimized application performance following best practices and utilizing modern development tools such as Vite, Git, and Vercel.
- Delivered clean, maintainable code with industry best practices.
- Maintained clear documentation and communicated progress regularly to clients, ensuring transparency and timely delivery.

Web Designer — *Business Partner Group, Remote*
Aug. 2024 - Jan. 2025

Technologies: HTML, CSS, JavaScript, Trello, Figma, Skype

- Contributed to the development of frontend components for key pages including Registration, Sign In, Coming Soon, and Landing pages, implementing responsive and user-friendly interfaces.
- Collaborated closely with the client to translate product requirements into clean, maintainable frontend code.
- Led UX writing efforts across the website and associated pages, crafting clear, concise, and user-centered micro-copy such as button labels, error messages, onboarding instructions, and notifications to enhance usability and reduce user friction.
- Managed issue documentation and quality assurance processes to ensure seamless frontend functionality and optimal user experience.

Frontend Developer — *ORO Business Group*
  Oct. 2023 - Sep. 2024

Technologies: *ReactJS, MUI, Rest API, Figma, Trello, Bootstrap, HTML, CSS, JS*

- Collaborated closely with mentors and team members to successfully complete multiple frontend development tasks and projects within an agile environment.
- Proactively expanded technical skills by studying JavaScript design patterns, asynchronous programming with async/await, and best practices in React development.
- Actively participated in code reviews, incorporating feedback to improve code quality, maintainability, and adherence to best practices.
- Gained practical experience in frontend development, version control (Git), and collaborative software development processes.

Education

Western Mindanao State University

San Jose Gusu, Zamboanga City, Philippines
Bachelor of Science in Information Technology

Projects

Leafly Booking Reservation
We built a self-care and wellness reservation platform offering simple scheduling and smooth user experiences. Designed user flows and refined interfaces that promote relaxation, clarity, and convenient access for individuals booking restorative wellness sessions.

Fvcndo Booking & Reservation System
Led the UX/UI design and contributed to frontend development for a modern booking and reservation platform, focusing on clear user flows, streamlined interfaces, and a seamless end-to-end experience across all devices.

Flux Trading Platform
Designed an intuitive and responsive trading interface prioritizing data clarity, user flow efficiency, and visual hierarchy. Enhanced complex information presentation through well-structured layouts and UX-driven design solutions.

Broadheader Website Builder
Designed and developed a dynamic website builder from concept to implementation. Created Figma prototypes and translated them into functional React components with smooth drag-and-drop interactivity and a responsive UI system.

PH Live Music Platform
Collaborated as a Frontend Developer to enhance a live music streaming platform. Contributed to building a responsive interface, improving navigation patterns, and

integrating real-time data for a seamless user experience.

ORO Admin Dashboard| *ReactJS, HTML, CSS, React Router, Axios, MySQL*
 Developed a functional demo admin dashboard showcasing data visualization and user management modules. Applied UX best practices for layout consistency, accessibility, and efficient data handling using mock datasets.
