PROFESSIONAL SUMMARY

Software Developer and UI/UX Designer with nearly three years of professional experience across responsive web applications, analytics dashboards, design systems, and customer-facing platforms. Combines React and JavaScript development with Figma-led product design, REST API integration, accessibility-minded interfaces, and hands-on QA. Experienced in cross-functional delivery, code reviews, and Git-based workflows.

TECHNICAL SKILLS

Frontend: React, JavaScript (ES6+), NextJS, TypeScript, HTML5, CSS3, Angular, Vite

Design & UX: Figma, wireframing, interactive prototyping, UI/UX design, design systems, UX writing

Engineering & QA: REST API integration, Supabase, Convex DB, MySQL, PHP, Git, GitHub, pull requests, code reviews, functional testing, regression testing, bug tracking, Vercel

Product experience: Auth, analytics dashboards, data visualization, multi-role interfaces, API integration

PROFESSIONAL EXPERIENCE

Frontend Engineer | Undisclosed Group

Mar 25, 2026 – Sep 18, 2026 | Remote | New York, USA

- Designed and implemented frontend experiences for Inspo, a social media intelligence platform, including creator analytics, performance dashboards, reporting views, and account-management interfaces.
- Built and refined dashboards and workflows for Yolk, including creator, writer, client, and internal-team views; improved information hierarchy, responsive layouts, and reusable interface patterns.
- Implemented client-view navigation safeguards and reporting enhancements, including access-aware route behavior and interactive performance charts with measurement details.
- Collaborated with product and engineering teammates through Git branches, pull requests, reviews, and deployment handoffs; documented progress and resolved UI defects.
- Created and executed functional QA test cases across authentication, dashboards, onboarding, analytics, and role-based interfaces; tracked issues and verified fixes.

UI/UX Designer | Broadheader IT Solutions

Nov 2024 – Feb 28, 2026 | Remote | Angeles City, Philippines

- Design and iterate innovative user interfaces and interactions, which result in improved user productivity and experience.
- Worked directly with the project manager and clients on requirements, technical recommendations, design iterations, documentation, and delivery updates.
- Led UI/UX design for trading platforms, booking services, corporate websites, and existing-product redesigns, translating business requirements into prototypes and production-ready interfaces.
- Developed responsive frontend components and page layouts, integrated REST APIs, and supported performance improvements using React, Vite, Git, and Vercel.
- Delivered clean, maintainable code with industry best practices and maintained clear documentation and communicated progress regularly to clients, ensuring transparency and timely delivery.

Web Designer | Business Partner Group
Aug 2024 – Jan 2025 | Remote | Brisbane, Australia

- Contributed to the development of frontend components for key pages including Registration, Sign In, Coming Soon, and Landing pages, implementing responsive and user-friendly interfaces.
- Collaborated closely with the client to translate product requirements into clean, maintainable frontend code.
- Led UX writing efforts across the website and associated pages, crafting clear, concise, and user-centered micro-copy such as button labels, error messages, onboarding instructions, and notifications to enhance usability and reduce user friction.
- Managed issue documentation and quality assurance processes to ensure seamless frontend functionality and optimal user experience.

Frontend Developer | ORO Business Group
Oct 2023 – Sep 2024 | Onsite | Zamboanga City, Philippines

- Collaborated closely with mentors and team members to successfully complete multiple frontend development tasks and projects within an agile environment.
- Proactively expanded technical skills by studying JavaScription design patterns, asynchronous programming with async/await, and best practices in React development.
- Completed frontend development assignments in a collaborative environment using JavaScript, React practices, and Git-based version control.
- Participated in code reviews and applied feedback on code quality, gained experience in frontend development, version control (Git), and collaborative software development processes.

PERSONAL PROJECTS

Zion Shop (Zion E-commerce) is a full-stack e-commerce app built with React, Shadcn UI, Supabase, and Clerk, featuring wishlists, cart management, and secure payment checkout.
Quantyx (Quantyx Trading Journal) High-density trading journal & performance analytics terminal built with React, TanStack Table, Supabase RLS, and Clerk.
DAMS (Digital Archiving Management System) is a university registrar web app that scans student documents, extracts text via OCR, and stores them in a searchable archive.

PROJECT COLLABORATION

Yolk (https://useyolk.com/) Built the creator marketplace and reporting platform end-to-end client dashboards, launch/campaign tracking, creator roster, and analytics reporting, with role-based views for agency, client, and creator users.
Broadheader (https://www.broadheader.com/) Designed Figma prototypes and developed responsive React components for an interactive ui, and responsive pages.

EDUCATION

Bachelor of Science in Information Technology | Western Mindanao State University, Zamboanga City, Philippines

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Introduction to Prompt Engineering for Generative AI - LinkedIn (Sep 2025)

Introduction to User Experience - Coursera (May 2023) | Introduction to UI/UX Design - DICT (Jun 2022)
